

## SINGLE GLASS WALL

J'Clickd is a simple system for constructing single glass walls. The circular system consists of only three parts: **a steel spring clip, skirting profiles and glass**. The bamboo skirting profiles cover the full contours of the windows and door frames so that the spring clips are completely concealed.

## TECHNICAL SPECIFICATONS

Basic information	
Use	Non-bearing interior partition walls
Module connection	PETG-Profiles
Ceiling connection	The existing structure of the ceiling or suspended ceiling
Structure	Bamboo, Steel & Glass
Acoustic performance	
Acoustic Laminated 16 mm	39dB
Acoustic Laminated 12 mm	37dB
Acoustic Laminated 12 mm	31dB
Standard dimensions of the glazed module	
Wall Thickness	60mm
Glass thickness	10, 12 or 16 mm Acoustic Laminated Glass
Profile Dimensions	60x50mm
Tolerance	max 30mm
Modulation (length)	1200 mm
Modulation (height)	Depending on glass thickness
Door options	
J'Swing Framed Single Glazed Door	
J'Swing Solid Door 40 mm
